DECISION OF THE ENERGY CHARTER CONFERENCE

Subject: Negotiations on Nuclear Instrument: Russian Federation Statement

The Chairman concluded that it was not possible to reach a consensus on the status of the Nuclear Instrument. He invited the Russian delegation to submit its position in writing, including an analysis of where the results of the Moscow Summit go beyond the present text and to be more specific on the need for, and the content of, a new binding instrument. This should be submitted to the December meeting of the Charter Conference.

Keywords: Nuclear Instrument, Russian Federation
