**DECISION OF THE ENERGY CHARTER CONFERENCE**

**Subject: Report on Progress in Implementation of PEEREA**

[The Energy Charter Conference at its 9<sup>th</sup> Meeting held on 17 December 2001 *adopted* a following conclusion on the Report on Progress in Implementation of PEEREA:]

“The Conference welcomed the report on the progress of implementation of PEEREA. The Conference took note of the progress made by various participating countries in developing energy efficiency policies and programmes, in reforming energy prices, in developing energy efficiency institutions and in increasing awareness. Nevertheless, much progress still remains to be done. Therefore the Conference requests countries to continue to be active in the review process established under PEEREA, benefiting from the peer pressure exercised by each of them. It also request countries to deliver the necessary information requested in order to allow reporting to the Kiev Ministerial Conference in accordance with the UN-ECE invitation. Furthermore the Conference requests countries participating in the work on PEEREA to continue to develop activities on issues essential for achieving a higher degree of energy efficiency: innovative financing solutions, reforming energy prices, promotion of efficient technologies are some of the areas which should be considered as a priority for medium term planning.”
