

# **INTERNATIONAL CONFERENCE ON: “DELIVERING ENERGY EFFICIENCY”**

**ORGANISED BY THE ENERGY CHARTER SECRETARIAT**

**IN COOPERATION WITH THE**

**MINISTRY OF ECONOMY AND FINANCE OF ROMANIA AND THE  
ROMANIAN AGENCY FOR ENERGY CONSERVATION**

**BUCHAREST, WEDNESDAY 23RD MAY 2007**

**VENUE: HOTEL INTERCONTINENTAL, BUCHAREST**

Energy Efficiency is becoming a policy priority at all levels of government, and the Energy Charter's Protocol on Energy Efficiency and Related Environmental Aspects (PEEREA) is supporting almost 50 countries across Europe and Asia in their endeavours to improve energy efficiency.

This International Conference, organised by the Energy Charter Secretariat in cooperation with the Ministry of Economy and Finance of Romania and the Romanian Agency for Energy Conservation, will provide the opportunity to analyse progress in implementing energy efficiency policies and programmes in countries subscribing to the Energy Charter's PEEREA, with a focus on the experience of Southeast Europe. It will provide a chance to understand how the liberalisation of energy markets is affecting the effectiveness and design of energy efficiency policy measures. It is also designed to generate a clearer understanding of the barriers to energy efficiency, which need to be addressed from an economic, regulatory and technological point of view, taking into account also the changing behaviour and expectations of end-users.

On the day following the Conference, 24 May, delegates will also be able to attend the final meeting of an EU-sponsored project on “Energy Efficiency Indicators in the European Union”. This meeting will address the key issues of how to monitor the effects of policies and measures on energy efficiency and how to allocate the merits of improvements.

The occasions for this International Conference is provided by a meeting in Bucharest on the inter-governmental PEEREA Working Group of the Energy Charter, which brings together energy efficiency experts from across the Energy Charter constituency meeting, and which provides a leading forum for policy debate and exchange of experience on energy efficiency issues. It is anticipated that the discussion at the Conference will provide ideas and guidance for the future activities of the Energy Charter in the area of energy efficiency.
