

Gas transit from non-EU country to non-EU country – case in Lithuania

19 June 2012

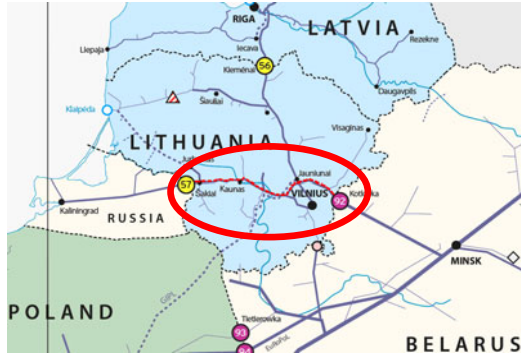

Stakeholder Event on Gas Transit and Cross-border
Cooperation

Gas transit through Lithuania - Route

Gas transit through Lithuania – Key Facts and Features

Capacity: 10.5 mcm/d

Quantity: 2.04 bcm/y (2011)

- Unique case in EU – gas transported from third country to third country – pure export of services
- Unregulated activity – all assets and costs removed from regulated tariffs based on the principles set by National Regulatory Authority
- Service provided on negotiated terms – long-term contract base
- Upcoming unbundling of TSO – no changes of terms of transit expected
