

Potential ADB's role in supporting regional energy cooperation in Northeast Asia

Ulaanbaatar Energy Charter Forum:
Developing Renewable Energy across
Gobitec and Asian Super Grid
in Northeast Asia

26 June 2014, Ulaanbaatar

ADB's Policies

- Strategy 2020 (long term strategic framework) supports (i) regional cooperation and integration, and (ii) climate change, as one of the core area of operation.
- Energy Policy 2009 supports effective regional cooperation in energy sector for strengthen energy security

How can ADB help? – Knowledge

- Knowledge support:
 - (i) Share experiences in regional power trade from other region (i.e. GMS and CAREC)
 - (ii) Technical knowledge based on real project experiences (i.e concentrated solar thermal (CSP) project in China, wind integration into district heating in Hohhot, China, wind integration study for China)

How can ADB help? – Technical Assistance

- Technical assistance support:
 - (i) Support creating a regional platform for regional power trade
 - (ii) Conduct studies for preparation of road map
 - (iii) Support regional conferences for knowledge sharing and consensus building

How can ADB help? – Financing

- Financing for potential project(s):
 - (i) Sovereign loan to the government – i.e. regional transmission lines
 - (ii) Non sovereign loan to private sector – i.e. renewable-based power plants, clean fossil fuel based power plants
 - (iii) Mobilizing co-finance from other development and commercial banks
 - (iv) Advisory services to potential deals as a neutral partner

Thank You
