**CALL FOR EXPRESSIONS OF INTEREST - PEER REVIEW TEAM FOR THE IN-DEPTH ENERGY EFFICIENCY REVIEW OF THE HASHEMITE KINGDOM OF JORDAN**

The Secretariat invites Contracting Parties and Signatories to the Protocol on Energy Efficiency and Related Environmental Aspects (PEEREA) to nominate experts to serve on the peer review team for the In-Depth Energy Efficiency Review (IDEER) of the Hashemite Kingdom of Jordan.

**Deadline for submission of nominations: 15 November 2026**

## The PEEREA and the review function

The PEEREA was adopted at Lisbon on 17 December 1994 and entered into force alongside the Energy Charter Treaty. Part II of PEEREA establishes the substantive commitments of Contracting Parties, including energy efficiency policies and appropriate legal and regulatory frameworks under Article 3(2), policy coordination under Article 4, transparent strategies and policy aims under Article 5, and the development, implementation and regular updating of domestic programmes under Article 8. Article 10(2) requires the Energy Charter Conference (Conference) to adopt procedures for keeping under review and facilitating the implementation of these provisions. The review function is therefore a requirement of the PEEREA and the Conference gave it operational form by approving a country review process supported by the Secretariat under Article 11(1) (CCDEC 1999 10 WPR).

## The In-Depth Energy Efficiency Review

The IDEER is the operational expression of that function and has served in this role since 1999. It gives practical effect to Article 3(1), under which Contracting Parties are to cooperate and assist each other in developing and implementing energy efficiency policies, laws and regulations. The Secretariat prepares each IDEER in partnership with the government concerned and with a peer review team of experts nominated by member countries to offer comparative experience. The completed report is presented to the relevant subsidiary body, the recommendations are submitted to the Conference for endorsement, and the report is thereafter published on the Secretariat's website.

## The In-Depth Energy Efficiency Review of Jordan

The IDEER is voluntary and country-led. The Hashemite Kingdom of Jordan volunteered for the exercise, and the process was initiated in 2023. The IDEER is being prepared jointly by the Secretariat and the Ministry of Energy and Mineral Resources, takes 2024 as its data anchor year, and covers energy efficiency together with its renewable energy and climate dimensions. Its chapters examine the energy sector context, the institutional and legal framework, economic regulation and pricing, renewable energy policy, energy efficiency policy and the National Energy Efficiency Action Plans, transport, industry and buildings, the environmental and

climate framework, and the financing of energy efficiency and climate action, addressing the matters covered by Articles 3 to 8 of the PEEREA as they arise in Jordanian conditions.

**Requirements and expertise of review team members**

The first full draft of the IDEER of Jordan has been developed. In accordance with the established review procedures, the draft is required to undergo peer review and consultation with the host country. The Secretariat is therefore constituting the review team so that its members are engaged in examining the draft report, its conclusions and recommendations, and presenting the report to the constituency.

Three experts are sought for the peer review team. Contracting Parties and Signatories to the PEEREA are accordingly invited to nominate one or more experts for consideration, based on their expertise and with a view to composing a team that brings together a range of relevant specialisms.

Nominees should be nationals of, or serve within the administration of, a Contracting Party or Signatory to the PEEREA other than Jordan. Experts serving in national ministries, regulatory authorities, energy agencies or comparable public institutions are particularly encouraged.

Nominations are welcome in particular from experts with experience in energy analysis and policy formulation, including the assessment of energy efficiency potentials and energy demand analysis, in the development of economic, legislative and regulatory measures, in energy labelling and efficiency standards, in energy efficiency in the building, industrial and transport sectors, in energy efficiency in power generation and network integration, in the financing of energy efficiency, and in information, statistics and the design of monitoring arrangements.

**Responsibilities of review team members**

Members of the review team are expected to undertake the following, with the support of the Secretariat.

- Examine the background package prepared by the Secretariat, comprising the draft report and the supporting policy, legal and statistical documentation.
- Take part in review missions and meetings (virtual and physical as required), whose agenda is elaborated by the host country in consultation with the Secretariat.
- Provide contributions, amendments and comments on the draft report, which the Secretariat then consolidates into the draft IDEER.
- Support the formulation of the recommendations addressed to the Government of Jordan, which are the element on which the constituency concentrates its consideration.

The IDEER is sent to the reviewed country for comment and general acceptance before it is circulated more widely. The recommendations are subject to the approval of the Conference.

**How to express interest**

Contracting Parties and Signatories wishing to contribute to the IDEER are invited to send a formal nomination letter, signed by the competent authority, to the Secretariat at info@encharter.org, to arrive **no later than 15 November 2026**. Requests for clarification regarding this call can be submitted to the same email address.

The letter should identify the nominated expert or experts and state, for each, the name and position held, the nominating institution, the areas of expertise offered, and contact details. A short curriculum vitae should be attached.

Further details can be obtained from www.encharter.org.

***Disclaimer:*** *Personal data submitted in connection with this tender procedure will be processed by the Secretariat in accordance with its Manual on Data Protection and applicable data protection legislation. Enquiries can be directed to legalaffairs@encharter.org.*
